

Why Choose Uncommon Solutions for your Microsoft Subscriptions via CSP

Uncommon Facts

Founded 2002

Microsoft Gold Partner since 2004

30 employees across multiple technology disciplines

Serving the Rocky Mountain Region and the U.S.

Remarkably Human IT

What is CSP?

Our clients find Microsoft's Cloud Solutions Provider (CSP) program to be the best way to buy their Microsoft subscriptions (licensing). Often tired of the long-term commitments and true-ups of an EA or the stress of figuring out on your own with a "Pay-as-you-go" plan. CSP through Uncommon Solutions allows you to adjust your license counts on a timeframe that works for you and provides competent guidance from a person when you need it - without taking away the transparency, fine-tune control, and accessibility of the website.

The Uncommon difference

Too often, our clients are wasting time on rabbit trails - researching SKU's and technicalities in their feature sets and limitations. Particularly in combination with a Purchasing Optimization Assessment (POA), Microsoft and Uncommon have truly optimized the process for our clients. Whether you are buying 25 seats or 2,000 seats, CSP takes the stress and guesswork out of the process and gives you the peace of mind that you are licensed optimally.

For **Uncommon Solutions** the CSP program is another way to enhance the customer experience and relationship. Partnering with Uncommon provides you **more than just licensing** - you will have access to a Microsoft Gold Partner with expertise across the entire Microsoft Stack of solutions. For Uncommon, it is about continual enhancement of the customer experience and being a CSP supports this core value.

UNCOMMON Believes: *At least 50% of any solution lies in clearly defining the problem.*
